

We are looking for

## **(Senior) UI DESIGNER (permanent position/freelancer) (m/f/d)**

We, ELSA & Co, are looking for a (senior) UI Designer. One who wants to use his expertise to make digital products better, one who, like us, wants to inspire people, and is passionate about leading his customers to success.

You want to take responsibility for hands-on concepts (again) – but actively and not just on paper – and implement your own ideas? Your eyes light up when you see the word “specifications”, you can pull flow charts out of your sleeve and your Axure files are sacred?

You would like to work in a small dynamic team, with responsible tasks at an awesome office in a cool, central location? Maybe you'd like to join us for a summer dip in the River Isar or jogging in the English Garden? How about cooking with us, learning, achieving the optimum work/life balance, doing things in a different way? Then why not join ELSA & Co?

### **These are your tasks**

- you develop user interface designs, scribbles, prototypes, user journeys (for websites, apps, e-commerce shops, platforms) with the focus on visual layout and brand-adequate design language
- you design digital brands, develop icon languages and design concepts
- you create innovative, scalable, elegant designs and interaction concepts taking into account future-oriented user and business targets
- you assume responsibility for your concepts, elaborate ideas in the team and bring these with passion to the customer
- you are sparring partner and initiator, solo performer and team player

### **What we offer**

- exciting and inspiring tasks and projects in an ambitious, unconventional agency for digital concepts and design
- a cool office in a Munich location that couldn't be more central or more attractive
- the best colleagues in the world, cooking together, living, being creative, and learning from each other in a family environment
- creative freedom within your job profile and independent working, flat hierarchies, short decision paths, possibility of home office and flexible working hours

### **Qualifications**

- you have completed a degree specializing in graphic design, communications design, interaction design, GUI design, or graduated in a similar course of studies
- you have several years of professional experience in the graphic design of user interfaces and websites with the focus on user-oriented, digital systems
- you have experience in the development of the logical structure of digital designs and Corporate Identity, as well as motivation and pleasure in building up a GUI framework
- you have pronounced visual design-oriented skills
- you are able to assess the user-friendliness and design quality of a graphic product, to question concepts and advance them further
- it is your aim to create the best user experience for the end consumer, to make customers happy
- you have a mastery of Photoshop, Sketch, Adobe XD, Illustrator and InDesign, and, ideally, experience in prototyping and interaction design
- you are determined to do things differently/better, want to work independently, are actively curious about current internet trends
- you are creative and analytical, you are enthusiastic, a lateral thinker, an organisational talent, a team player
- you have strong communication and presentation skills, and enjoy contact with customers

We look forward to receiving your application, stating your salary expectation and your earliest possible starting date ([info@elsa-und-co.de](mailto:info@elsa-und-co.de)).
